

MOHAMMED AL-YAZJI

Flutter Developer | Front-End Developer | Web Security

Cairo, Egypt | +972 59 503 1617 | mohammedalyazje87@gmail.com | linkedin.com/in/mohammed-alyazje

PROFESSIONAL SUMMARY

Flutter and front-end developer with two years of hands-on freelance and project experience building cross-platform mobile applications and responsive web interfaces, with practical skills in website security assessment and basic security hardening. Skilled in Dart, Flutter, Firebase, secure authentication, role-based access, Arabic RTL UI, Android/web deployment, and identifying common web vulnerabilities. Known for accurate implementation, clear communication, and on-time delivery.

TECHNICAL SKILLS

Mobile & Front-End: Flutter, Dart, Android, HTML, CSS, JavaScript, responsive UI, Arabic RTL

Web Security: Website security assessment, vulnerability identification, OWASP Top 10 awareness, secure authentication, access control, input validation

Backend & Data: Firebase Authentication, Cloud Firestore, Hive CE, SharedPreferences, REST APIs

Security & Tools: Firebase Security Rules, basic security hardening, HTTPS/configuration review, Git, GitHub, VS Code, Firebase Console

SELECTED FLUTTER PROJECTS

Exchange Ledger - Currency Exchange & Profit/Loss App

Flutter, Dart, Firebase Authentication, Cloud Firestore, Hive CE, Firebase Security Rules

- Built a multi-account ledger for USD, USDT, EGP, and EUR with buy/sell transactions, balance updates, and automatic profit/loss calculations.
- Implemented secure email login, verification, password reset, per-user data isolation, biometric access, local persistence, live/manual exchange rates, and PDF/Excel exports.

Stable Manager - Horse Stable Management App

Flutter, Dart, Firebase Authentication, Cloud Firestore, Arabic RTL, Role-Based Access

- Developed role-based admin and owner experiences for managing horses, feeding, health care, approvals, monthly costs, and reports.
- Designed secure data access so owners view only their records while administrators manage the complete system.

CYBERSECURITY & WEB SECURITY

- Conduct authorized website security reviews to identify common vulnerabilities, weak authentication, access-control issues, unsafe input handling, misconfigurations, and exposed data.
- Apply basic security hardening through secure authentication, role-based permissions, input validation, Firebase Security Rules, HTTPS, and clear remediation recommendations based on OWASP concepts.

EXPERIENCE

Freelance Flutter, Front-End & Web Security Developer

2 years of freelance and project-based development experience

- Created Flutter mobile interfaces, responsive screens, forms, validation, navigation, secure login flows, and data-driven features.
- Developed responsive websites using HTML, CSS, and JavaScript, and performed authorized security checks with basic vulnerability remediation and configuration hardening.

EDUCATION

Bachelor's Degree in Computer Information Systems

Al-Quds Open University | Apr 2019 - Oct 2022 | Grade: 88% - Excellent

Relevant studies: programming fundamentals, databases, web development, information systems, and technology solutions.

LANGUAGES & ADDITIONAL STRENGTHS

Languages: Arabic (Native), English (Good working proficiency) | **Strengths:** Accuracy, clean layout, problem solving, clear communication, on-time delivery
